

Business Plan

Pickle Lake Wireless Internet Connectivity Solution

Prepared by Northern Wireless Internet Ltd. 7 March, 2003

Business Summary

Create a formal business relationship between the Township of Pickle Lake (TPL) and Northern Wireless Internet Ltd. (NWI). TPL can provide towerspace, office space and a resource and NWI can provide equipment and resources. Mish shall provide tower space only and act as a customer to NWI/TPL. The wireless solution is based upon the supply and integration of “off-the shelf” 802.11b equipment for last mile and 5.8 GHz equipment for back haul. We propose to implement a proven solution providing broadband to the end user via the 802.11b standard.

Mission Statement

To supply a complete wireless high speed internet access solution in Pickle Lake and Mish. Engineer, manufacture, procure, install and commission these systems with proven experience and high quality using cutting edge technology. Implement the necessary business process to ensure the business succeeds. Ensure video conferencing functions properly within the scope of this project.

The players

- Jim Cox – Project Manager
- Stephane Gauvin – Engineering and Manufacturing

Market Summary

Our target market is the schools, clinic, businesses, residential and Mish. The attached list indicates all parties in the Pickle Lake/Mish areas that are interested in acquiring broadband.

1. 2 Schools - Connell & Ponsford District Area School Board

5. Clinic
6. North Star Air
7. Winston Motor Hotel
8. Pickett's Bed & Breakfast
9. Frontier Foods
10. Patricia Auto Sales & Service
11. North Pop Ltd.
12. Mistik North Inc.
13. Graham's Services
14. Sigfusson Northern
15. Pickle Lake Auto
16. Carter Rice Esso
17. Lockwood Enterprises
18. K & K Tackle
19. Pickle Lake Hotel
20. Northern Store

Business Concept

Northern Wireless Internet is in business to build innovative wireless solutions and generate profit for its shareholders. TPL is a not for profit organization that wishes to assist in easing the burden of the business case for broadband in Pickle Lake.

Northern Wireless shall manage, supply, install and finance the wireless infrastructure and the feed to the internet. NWI shall be responsible for buying and reselling the 1.54 Mbps T1 line within the area and will be considered an ISP (Internet Service Provider). TPL shall supply Computer Servers, (per NWI specifications), office space to Servers and Router. TPL shall also provide a part time resource to watch over equipment and perform small tasks re server maintenance per our direction.

Competition

TV Cable modems, satellite, and Bell DSL are potential threats in certain market areas. These technologies are not affordable in small population centers. It may be years before it will be affordable in our market.

There are wireless ISP's out there that are growing in size but they are all in large urban areas or in small towns close to cities. We are the only company that provides a powerful inexpensive solution.

Goals

- Obtain written broadband purchase agreements from schools, clinic, Mish and any major participants by April 15, 2002
- Have all participants agree to this plan in principal by April 15, 2002
- Obtain approval for NWI Government Guaranteed Loan April 22, 2002
- Begin marketing campaign

Resource Requirements by NWI

Marketing and Sales planner
Manufacturing and quality technician (incl CSA)
Engineering drawings and technical manuals
Wireless Networking specialists
Server and networking specialists
Antenna and RF cable installation person
Tower climbers
Technical support person
Material procurement
Book Keeper
Accountant

Risk Identification

Risk – End users fail to purchase monthly plans.

Mitigation plan – Have the bigger players such as schools, Wasaya air and Mish sign agreements that they will purchase a plan for an agreed upon rate.

Risk – System does not meet customer expectations.

Mitigation plan – We know system works, make sure we describe terms of sale explicitly.

Costs

Estimate of costs for NWI portion including Management, Engineering, Supply, Installation and commissioning dollars. See Attachment "A" - Typical Cost for a 100 Customer last mile system.

Financial Plan

See Attachment "B" - 5 year forecast.
